Taxpayers' Union-Curia Poll: July 2026

Here are the headline results for July's *Taxpayers' Union – Curia* Poll:

Party	Support	Change compared to June 2026
Labour	31.5%	↓0.7
National	30.5%	↑0.4
NZ First	10.8%	↓0.6
Green	10.4%	↓1.1

ACT	6.9%	↓0.9
Te Pāti Māori	3.4%	↑0.3
Other	6.5%	↑2.5

Labour is down 0.7 points to 31.5%, while National is up 0.4 points to 30.5%. New Zealand First is down 0.6 points to 10.8%, while the Greens are down 1.1 points to 10.4%. ACT is down 0.9 points to 6.9%, while Te Pāti Māori is up 0.3 points to 3.4%.

For the minor parties, TOP is on 3.3% (+0.1 points), NZ Outdoors and Freedom is on 0.8% (+0.5 points), and New Conservatives are on 0.4% (+0.2 points).

This month's results are compared to the last *Taxpayers' Union-Curia* poll conducted in June 2026.

Party	Seats	Change compared to June 2026
Labour	41	↑1
National	39	↑1
NZ First	14	NC
Green	13	↓1
ACT	9	↓1
Te Pāti Māori	4	NC

This shows how many seats each party would win in Parliament, based on the decided vote.

Labour gains 1 seat to 41, while National also gains 1 to 39.

New Zealand First is unchanged on 14, while the Greens are down 1 seat to 13.

ACT is down 1 seat to 9, while Te Pāti Māori also remain unchanged on 4.

This calculation assumes there are no overhang seats for National and Te Pāti Māori. [An explainer for this assumption can be found here.](#)

The combined projected seats for the 'Government Parties' Bloc is unchanged on 62.

The combined seats for the 'Opposition Parties' Bloc is unchanged on 58.

On these numbers, the current three parties of Government would be able to form a Government.

The Left bloc (Labour and the Greens) remain stronger on 54 seats (nc), compared to the Right bloc (National and ACT) which are on 48 seats (nc).

The last time either bloc commanded a majority without needing a support partner (NZ First or Te Pāti Māori) to be able to form a Government was December 2024.

Chris Hipkins gains 2.1 points to 19.2%, while Christopher Luxon gains 0.3 points to 19.1%.

Winston Peters drops 1.0 point to 11.8%, David Seymour drops 1.2 points to 5.1%, and Chlöe Swarbrick drops 3.5 points to 4.6%.

39.2 percent (+5.5 points) say the country is heading in the right direction, while 45.5 percent (-7.0 points) say the country is heading in the wrong direction.

The net country direction is -6.3 percent (+12.5 points), the highest figure since November 2025.

Media Summary Statement

This poll should be formally referred to as the “Taxpayers’ Union-Curia Poll”.

Any media or other organisation that reports on this poll should include the following summary statement:

The poll was conducted by Curia Market Research Ltd for the Taxpayers’ Union. It is a random poll of 1,000 adult New Zealanders and is weighted to the overall adult population. It was conducted by phone (landlines and mobile) and online between Wednesday 01 July and Sunday 05 July 2026, has a maximum margin of error of +/- 3.1% and 6.6% were undecided on the party vote question.

Notes

The scientific poll was conducted by *Curia Market Research* and commissioned by the *New Zealand Taxpayers’ Union*. The full polling report is being released exclusively to members of our *Taxpayer Caucus*. As is well known, but for full disclosure, David Farrar co-founded the *Taxpayers' Union* and previously served on its board. He is also a Director of *Curia Market*

Research Ltd.

The *Taxpayers' Union-Curia Poll* was conducted from *Wed 01 July to Sun 05 July 2026*. The median response was collected on Thu 02 July 2026.

The target population is adults aged 18+ who live in New Zealand and are eligible and likely to vote. The sample population is adults aged 18+ who live in New Zealand and are eligible and likely to vote who are contactable on a landline or mobile phone or online panel. 1,000 respondents agreed to participate, 700 by phone and 300 by online panel. The number of decided voters on the vote questions was 908. There were 66 (6.6%) undecided voters and 25 (2.5%) who refused the vote question.

A random selection of 7,000 NZ phone numbers (landlines and mobiles) and a random selection from the target population from up to three global online panels (that comply with ESOMAR guidelines for online research). If the call is to a landline, the person who is home and next has a birthday is asked to take part. Those who take part through an online panel are excluded from further polls on the same topic for six months.

Multiple call-backs occurred to maximise the response rate. Those who said they were unlikely or very unlikely to vote were excluded.

For seat projections it is assumed all current parliamentary parties with electorate seats will win at least one electorate seat and be eligible for List MPs. However no overhang seats are assumed or projected.

The poll was part of a wider omnibus survey for multiple clients. Questions on voting sentiment are asked before any other questions.

The results are weighted to reflect the overall voting adult population in terms of gender, age, and area.

Based on this sample of 1,000 respondents, the maximum sampling error (for a result of 50%) is +/- 3.1%, at the 95% confidence level. Results for sub-groups such as age and area will have a much higher margin of error and not seen as precise.

[The polling questions and the order in which they were asked can be found here.](#)

The Taxpayers' Union is 100 per cent politically independent. We are not affiliated with any political party and will never become a political party. We work with all parties, MPs or candidates that share our objectives. We work with any and all political parties and other organisations to expose government waste and low-quality government spending. Individual members have their own political involvements, but as an organisation the Taxpayers' Union is vigorously independent in promoting the interests of New Zealand taxpayers.
